

OXSA

ONE OF THE STRONGEST SNOW BLOWERS FOR PRO USE!

Brochures pictures are sketches. Colors and stickers can change from final product.

OXSA SNOW ACCESSORY- BACK BLADE

Designed and produced in Finland for Nordic winter.

With OXSA SNOW hydraulic Back Blade you can get more closer to walls and openings.
Hydraulic blade will also help to get all the ice from the road when you can force press it with hydraulic cylinder.

OXSA SNOW ACCESSORY - BACK BLADE

Back Blade have slots for plowing stick. When inserted, it helps you to see blades outer edges more properly.

OXSA snow blowers are ready for Back Blade without any modification. This bolt mounted accessory can be set to newer and older models.

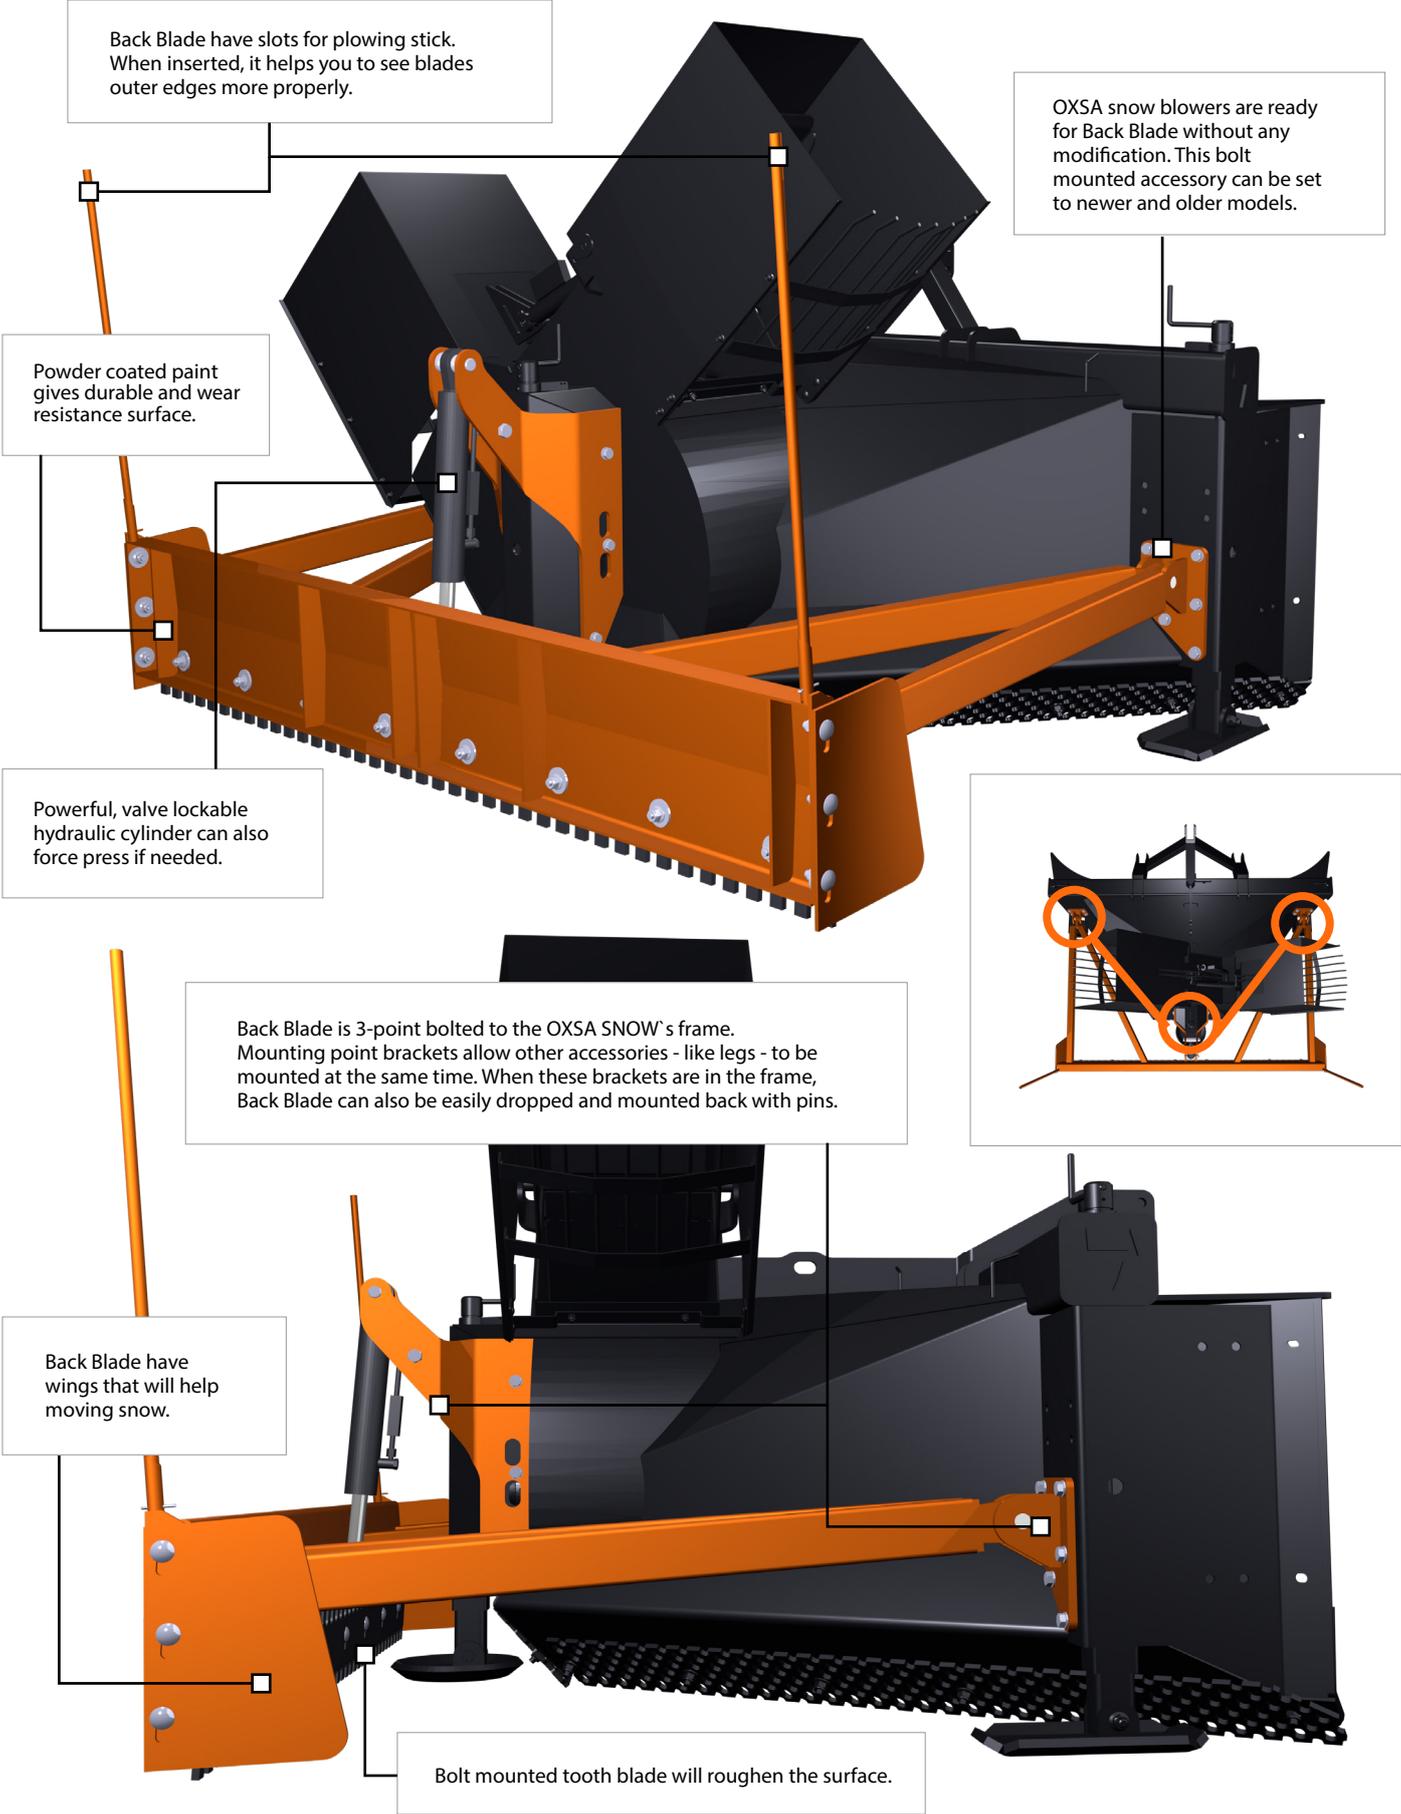

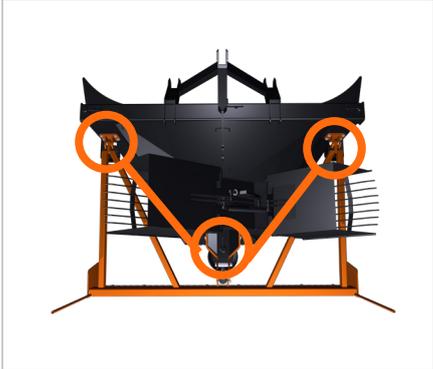

Powder coated paint gives durable and wear resistance surface.

Powerful, valve lockable hydraulic cylinder can also force press if needed.

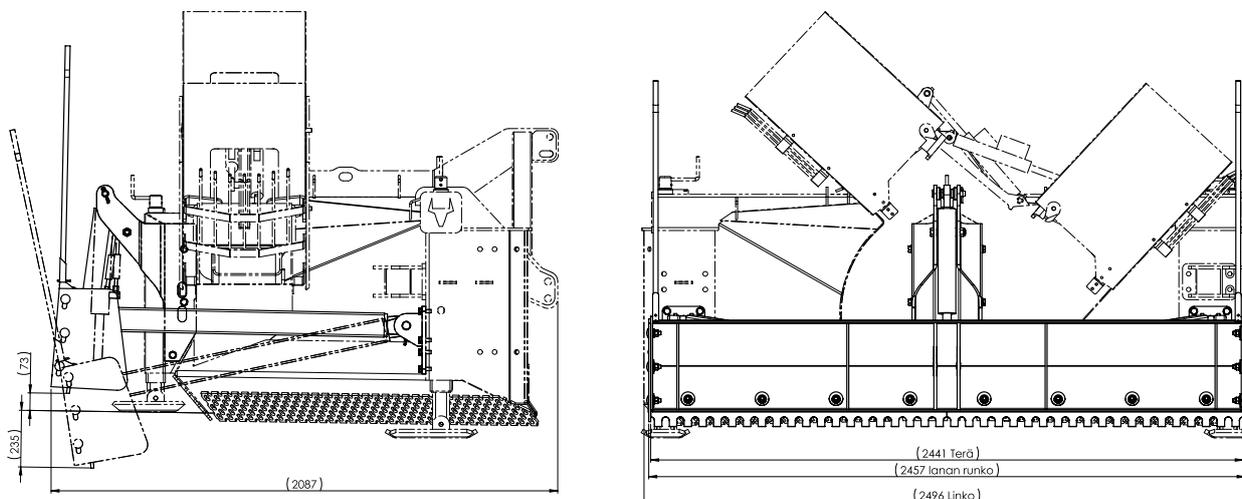

Back Blade is 3-point bolted to the OXSA SNOW's frame. Mounting point brackets allow other accessories - like legs - to be mounted at the same time. When these brackets are in the frame, Back Blade can also be easily dropped and mounted back with pins.

Back Blade have wings that will help moving snow.

Bolt mounted tooth blade will roughen the surface.
